

A dense field of red blood cells, appearing as biconcave discs, filling the entire frame. A semi-transparent red oval is centered over the image, containing the title text. In the bottom-left corner, there is a blue and white geometric graphic element. In the bottom-right corner, there is a white rectangular box containing the text 'HAP Unit 5th'.

BLOOD GROUPS

HAP Unit 5th

Contents

Introduction

Blood group systems

- ❖ ABO blood group system
- ❖ Rh blood group system

Introduction

- ▶ A blood group also called a Blood Type
- ▶ Classification of blood is based on the presence or absence of inherited antigenic substances on the surface of red blood cells (RBCs)
- ▶ These antigens may be proteins, carbohydrates, glycoproteins, or glycolipids, depending on the blood group system.

ABO Blood Group System

➤ The **ABO blood group system** is the most important blood type system (or blood group system) in human blood transfusion.

➤ ABO blood types are also present in some other animals

for example rodents and apes such as chimpanzees, bonobos and gorillas.
